### ONSOLVE

Each tenant is required to provide contacts from their organization that will receive emergency notifications through ONSOLVE. This service allows the building management to communicate critical information to tenants during evacuations, civil disturbances, or larger incidents that may occur in or around the building.

Tenants can provide as many contacts as needed. Please ensure if your Emergency Response Team(s) would like to be on the emergency notification list, they are on both forms (Emergency Response Team Information & Onsolve Emergency Notification Form).
